

FORMAX

CATTLE 13% W/BOVATEC

Item number 233380

MEDICATED

For increased weight gain in pasture cattle (stocker cattle, feeder Cattle, and Dairy and Beef Replacement Heifers) For control of coccidiosis caused by EIMERIA BOVIS and EIMERIA ZUERNII.

ACTIVE DRUG INGREDIENT

LASALOCID

30 GM/TON

Caution:

The safety of Lasalocid in unapproved species has not been established. Do not allow horses or other equine access to Lasalocid as ingestion may be fatal. Feed continuously at the rate of no less than 60mg nor more than 200mg of Lasalocid per head per day. This feed contains 15mg of Lasalocid per pound of feed. The use of this drug will not affect reproductive performance of cattle. There is no slaughter withdrawal period when using this drug.

GUARANTEED ANALYSIS:

Crude Protein, (not less than)	13.00%
Crude Fat, (not less than)	2.00%
Crude Fiber, (not more than)	20.00%

INGREDIENTS:

Grain Products, Plant Protein Products, Processed Grain By-Products, Calcium Carbonate, Roughage Products, Forage Products, Molasses Products, Dicalcium Phosphate, Salt, Bovatec, Vitamin A Supplement, Vitamin D3 Supplement, Vitamin E Supplement, Vitamin B12 Supplement, Menadione Sodium Bisulfate Complex, Choline Chloride, Riboflavin Supplement, Thiamine Mononitrate, Niacin, D-Calcium Pantothenate, Folic Acid, Biotin, Pyridoxine Hydrochloride, Ferrous Sulfate, Copper Sulfate, Zinc Oxide, Maganous Oxide, Sodium Selenite, Ethylenediamine Dihydriodide, and DL Methionine

Manufactured By
ALABAMA FARMERS COOPERATIVE, INC.

Feeding Directions:

Format Stocker 13% with Bovatec is one of our most popular feeds. A very inexpensive all natural pelleted feed that can be used as a creep feed, bull feed, heifer feed or cow feed. This feed will provide energy, protein, minerals, and vitamins to cattle that are fed on a daily basis. This feed can be fed up to 1.5% of the body weight of the animal on a daily basis (1000 lb. cow= 15lbs of feed). This feed makes an excellent creep feed and will work very well through a creep feeder. Creep feeding calves can be beneficial to the producer when the cost of a pound of gain is less than the market value of that calf. Five pounds of this feed should produce one pound of gain for your calves being creep fed. This feed also will work very well as a starter feed for calves that are being weaned. Bovatec is added to promote growth, increase feed efficiency, and reduce the incidence of coccidiosis. Bovatec will not affect reproduction, therefore this feed can be fed to all classes of cattle as a feed supplement. This feed should not be fed free choice to weaned calves or mature animals. Do not feed to horses. Do not feed to sheep due to levels of copper. When feeding breeding stock, remember that excess fat can lead to poor reproductive performance, therefore, feed heifers an amount of not more than 1.5% of their body weight (600lb X 1.5% = 9lb of feed) This product should be fed in a bunk feeder due to small pellet size.

Important Management Practices

Provide a source of fresh clean water and free choice mineral at all times. When making any change in an animal's diet, plan a 7 to 10 day transition period. Provide ample feeder space of 18 inches per animal. Feeders should protect feed from becoming wet and moldy. Poorly managed feeding programs can increase the possibility of feeding disorders.
