Decatur, Alabama 35601

Feeding Directions

CO-OP Game bird Booster is a very popular feed designed with performance in mind. This 11 grain scratch with extra oil and fat is very popular with game bird producers. Each grain provides specific nutrients and other benefits to these birds. This 14% protein feed contains extra vitamins and minerals to reduce stress, and sickness in game birds. The minerals and vitamins will increase their immune system to fight of disease, while the extra fat and oils will provide increased amounts of energy. This feed can be fed to birds free choice. This feed is also an excellent feed for wild birds. If the feed becomes dry it is still safe to feed to other birds. This feed should not be fed as a chick starter or as a laying feed.

Important management practices

Always provide a source of fresh, clean water, Do not allow feed to become wet or moldy. Always keep feeders and waterers clean. Do not make sudden changes in the diets of game birds. When changing feeds, allow a 7 to 10 day transition period.
